

## ABBEY PARK SCHOOL

Dear Parent/Carer,

If your child has asthma we would be grateful if you could complete the attached form and return it to school as soon as possible. All completed forms will be kept in school alongside our Asthma Register.

Please let us know if your child's regular treatment is changed at any time. It is important that you tell us in order that our records can be updated.

If your child is likely to need asthma treatment while at school, please ensure they have a workable inhaler with them in school at all times, including school trips. Please also make sure it's clearly labelled with his or her name. Emergency Salbutamol Inhalers will be kept in the school First Aid room along with spacers.

### IMPORTANT

Poorly controlled asthma can interfere with a child's school performance. Please let the school know if your child's asthma is being more troublesome than usual, especially if their sleep is being disturbed.

Please sign the attached consent form regarding the administration of the Emergency Salbutamol Inhaler in the event that your child has a severe attack in school.

A copy of the Asthma Policy is available to view on the school website under 'Supporting Students with Medical Conditions Policy' in the First Aid section.

Yours sincerely

Mr Young  
Operational Principal
